

cell-cell signaling

cell maturation

heterotypic cell-cell adhesion

homotypic cell-cell adhesion

platelet degranulation

platelet activation

negative regulation of T cell proliferation

response to lipopolysaccharide

localization within membrane

STAT cascade

regulation of interferon-gamma production

response to bacterium

positive regulation of smooth muscle cel...

negative regulation of angiogenesis

substrate adhesion-dependent cell spreading

cellular response to chemical stimulus

innate immune response

response to organophosphorus

response to purine-containing compound

positive regulation of cytokine production

negative regulation of cytokine production

regulation of type I interferon production

positive regulation of response to cytokine

response to exogenous dsRNA

cellular response to virus

cytoplasmic pattern recognition receptor signalling pathway
